

## **Nanyang Technological University Lower Leg Dataset Version 1 Release Agreement**

The goal of the Nanyang Technological University Lower Leg Dataset Version 1 (NTULLS v1) is to develop new technologies, techniques, methods, algorithms and systems for automatic criminal and victim identification based on skin biometrics in forensic settings. As this lower leg image dataset is dedicated to criminal and victim identification, to speed up the technology development in this area, we would like to share the database to other scientists who are interested in this area of research on a case by case basis.

The database contains 100 images from 67 subjects in session 1 and 668 images from 479 subjects in session 2 (The left leg images were flipped and considered as right leg images from other subjects). The images are available in .png format; no other image formats will be provided.

To receive a copy of the database, researchers must sign this document and thereby agree to observe the restrictions listed in this document. Failure to observe the restrictions listed in this document will result in access being denied for the balance of the NTULLS v1 and being subject to civil damages in the case of publication of images that have not been approved for release, a violation of restrictions 3, 4 and 5 below. The database will be available to researchers in the form of online. There will be no charge for the database. The researcher(s) agree/s to the following restrictions on the database:

1. The NTULLS v1 will not be further distributed, published, copied, or further disseminated in any way or form whatsoever. This includes further distributing, copying or disseminating to a facility or organization unit in the requesting university, organization, or company.
2. All requests for copies of the database will be forwarded to the person in charge at the Nanyang Technological University (NTU), Singapore.
3. Images from this database can only be allowed to appear in technical reports, papers, and other documents published or released.
4. All the images will be used for the purpose of academic or scientific research in forensic identification only. The database, in whole or in part, will not be used for any commercial purpose in any form. Commercial distribution or any act related to commercial use of this database is strictly prohibited.
5. The images will never be associated to any persons or any group of persons.
6. All documents and papers reporting research results obtained using the database will acknowledge the use of the NTULLS v1 using the following statement: "Portions of

*Cyber Security Lab, School of Computer Science and Engineering  
Nanyang Technological University Singapore  
All Rights Reserved.*

the research in this paper use the Nanyang Technological University Lower Leg Dataset Version 1. Credit is hereby given to the Cyber Security Laboratory at the School of Computer Science and Engineering, Nanyang Technological University, Singapore for providing the database.” The documents and papers will also add citations to :

[1]. Frodo Kin Sun Chan, Adams Wai Kin Kong, "A further study of low resolution androgenic hair patterns as a soft biometric trait", In Image and Vision Computing, 2017, ISSN 0262-8856.

7. Images in this database and results derived from this database will only be stored in the IT infrastructure/systems owned by the organization that the researchers work for. Images in this database and results derived from this database will never be stored in the IT infrastructure/systems owned by other organizations, including but not limited to, icloud and dropbox.
8. While every effort has been made to ensure accuracy, the database owners cannot accept responsibility for errors or omissions. The database owners reserve the right to revise, amend, alter or delete the information provided herein at any time, but shall not be responsible for or liable in respect of any such revisions, amendments, alterations, or deletions.
9. The database owners reserve the right to terminate the usage permission of the database given to the researcher(s) at any time. Once the researchers receive the notification of termination, they must immediately delete the entire database and all results derived from this database in their systems.

**The person in charge:**

Associate Professor Adams Kong

School of Computer Science and Engineering

Nanyang Technological University

Block N4, 50 Nanyang Avenue Singapore 639798

**Download instruction:**

All requests for the NTULLS v1 must be directed (by email) to the following address: [forensics@ntu.edu.sg](mailto:forensics@ntu.edu.sg). Applicants should **manually fill, sign, scan and attach** the application form to the given email address. Upon receipt of an executed copy of the signed application form, access instructions will be given.
